SKILLS

LANGUAGES

• JavaScript • C++ • TypeScript • Python • HTML
• XML • JSON • Java

LIBRARIES

• React JS • Redux • Zustand • Zod

FRAMEWORKS

• React Native • Node.js • Express.js • Tailwind CSS
• Next.js • Bootstrap

AI/ML SKILLS

• Prompt Engineering • Data Annotation (Text/Image
- Basic) • AI Model Evaluation

DATABASE

• SQL • MySQL • MongoDB

PROGRAMMING PARADIGMS

• Data Structures & Algorithms (DSA)
• Object-Oriented Programming (OOP)

TOOLS

• Git • GitHub • Docker • Postman • Cursor • Google
Analytics • Wordpress • Figma • Canva

SEO AND ANALYTICS

• Basic SEO Principles • SEO-friendly Web
Development • Google Analytics (Basic) • Google
Search Console (Basic)

CLOUD SERVICES

• AWS EC2

DEVELOPMENT PRACTICE

• Agile Methodology

OPERATING SYSTEM

• Linux • Windows

ACHIEVEMENTS

- Smart India Hackathon (SIH) 2025 (Semi-Finalist)
- Smart India Hackathon (SIH) 2024 (Participant)

EXPERIENCE

SEVYSIS PVT. LTD. | Technical Intern Feb 2025 – May 2025 | Remote, IN

- Developed scalable React.js applications with reusable component architecture, integrating RESTful APIs, authentication, and dynamic state management, improving code maintainability by 30% and application responsiveness by 25%.
- Implemented enterprise-level features including role-based access control (RBAC), protected routes, search, filtering, pagination, reusable forms, and interactive dashboards, enhancing workflow efficiency and user experience by 30%.
- Optimized frontend performance using lazy loading, code splitting, memoization, and efficient rendering techniques, while collaborating in an Agile environment with Git/GitHub for feature development, debugging, and code reviews, reducing page load time by 35%.

DIV AND SECTION PVT. LTD. | Web Developer Intern Aug 2021 – Sep 2021 | Remote, IN

- Developed a college management system using Java, Hibernate, JDBC, and MySQL, reducing manual operations by 50%.
- Implemented role-based access and optimized backend workflows, improving system efficiency by 45%.

PROJECTS

AI-POWERED MIGRAINE TRIGGER TRACKER | Python, Machine Learning, Streamlit, IoT Sensor Data Integration

An intelligent health-tracking application that uses AI and data analytics to detect, predict, and prevent migraine attacks. The system analyzes user lifestyle, sleep, and environmental data to identify personalized triggers and provide early alerts and preventive suggestions. Worked on text classification / labeling tasks for NLP datasets. Evaluated model outputs and improved prediction accuracy.
